Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-22</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-22</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-22</u>	YES

2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

D1: DE 23 63 921 A (KORSCH SPEZIALFAB EMIL) 3 July
1975 (1975-07-03)

D1, which is considered to be the prior art closest to the subject matter of claims 1 and 21, describes (see page 7, line 12 to page 10, line 12; the references between parentheses apply to said document):

a facility including a tabletting machine, the machine having at least one chamber (12); said facility further includes means (49 to 66) for conveying gas into the chamber (12) and causing it to circulate therein; said means (49 to 66) are for controlling a gas temperature at a given location (64 to 66) so that a temperature of the gas inside the chamber (12) reaches a predetermined value.

The associated tablet manufacturing method also uses this temperature control inside the chamber.

Consequently, the subject matter of claims 1 and 21 differs from the known facility and the associated manufacturing method in that the means are for controlling a temperature of the gas upstream of the chamber.

The subject matter of claims 1 and 21 is therefore novel

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

(PCT Article 33(2)).

The problem that the present invention is intended to solve can be considered to be that of selecting a new position for controlling the temperature.

The solution to this problem, as proposed in claim 1 and 21 of the present application, is considered to involve an inventive step (PCT Article 33(3)), since it is neither described nor suggested in the prior art.

Claims 2 to 20 and 22 are dependent on claims 1 and 21 and thus also comply, as such, with the PCT requirements of novelty and inventive step.
